EXTERNAL THERMALLY BROKEN  
B60 BI-FOLDING DOORS

## **THERMALLY BROKEN B60 BI-FOLD DOORS**

The specially designed shape of our profiles, combined with the highest quality galvanised steel with just a 60mm steel profile in a double thermally broken glazing for the temperature inside stays just as you want it.

## **INVITE ART TO YOUR HOUSE**

Black Steel Doors are a perfect addition to any property, adding a touch of modernism to refurbished properties or adding character to modern loft-style apartments. Their minimalist, slim look will enhance the design of any room.

## **BRING LIGHT AND SPACE TO YOUR INTERIORS**

Are your rooms feeling cramped and dimly lit? Or do you want to increase the light and space felt in an office or living area with limited natural light? Black Steel Doors, thanks to their ultra-slim 20mm profile, increase light in those dark rooms, bringing darker rooms to light with a natural, non-intrusive style.

# EXTERNAL BI-FOLD DOORS THERMALLY BROKEN

## YOU CAN MIX AND MATCH DIFFERENT DOORS WITH OUR EXTERNAL PARTITION PANELS.

With slim steel frames and large glass panels, our external doors will bring an on-trend industrial loft-style look to your property. Built with slim sight-lines without sacrificing strength or durability, the adaptable steel-framed doors can be hand-designed for any opening. Incomparable timeless style for traditional or modern buildings.

Each project is important to us, so our doors are bespoke. Security and stability is no issue as our steel doors provide up to three times the strength of aluminium framed alternatives, resisting warping and bending over time. Powder coating helps retain strength throughout the life of your doors.

# STYLE GUIDE

We offer these frames in a wide range of colours and finishes, so your doors will compliment whatever space you put them in. Download our style examples below to get some ideas to start you off.

With a timeless, elegant appearance our steel doors fit both traditional builds and new, modern designs, fitting seamlessly with your existing walls.
